Africa only · every claim carries its source and date

What this is not

It does not include us contacting any of them. You run the outreach.

It is not an introduction. Nothing here includes a meeting, a warm handover, or anyone from MRX approaching a company on your behalf. That is a mandate, and it is a different product.

Provenance, on every claim

Every claim in the full deliverable is tagged so you know what you are relying on: **[D]** desk, public source named and dated · **[P]** pipeline, our own sourcing, Reoon power-mode verified · **[F]** field, observed by our operators in market · **[E]** estimate, our calculation with the method shown.

About this sample. It shows what the deliverable covers and how we approach it. Every operational figure, rate, name, margin and deadline is withheld, because that is what you are buying.

How the rows are built

- **Sourced fresh for your order.** We do not resell a client deliverable or a stale file.
- **Filtered against your category** before any verification spend, so you are not paying for rows that were never relevant.
- **Verified in power mode**, never quick mode, which returns a false positive for any address on a catch-all domain.
- **Failed rows are removed, not padded.** If a pull yields fewer good companies than the ceiling, you get fewer, and we tell you the number.
- **Excluded counts are disclosed**, so you can see what did not survive rather than assuming everything did.

In the delivered file the company name, full contact name, direct email, phone and LinkedIn are complete and unmasked. Only deliverable and safe-to-send rows ship.
